

Made from bio-products sourced from freezing works' waste and sheep manures, this odourless organic bark fine-based compost is excellent for large-scale plantings or establishing newly planted areas. Composted over a 12-month period and free from chemical sterilisation, Barnyard Compost is an organic-based compost which has gone through a natural heating process to kill weeds. Great for application in rural areas and lifestyle blocks.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Nutritional compost
pH*:	5.5-6.0
AFP:	24%
Bulk Density:	750kg/m ³

*due to the organic base, pH/AFP is an indicative average only.

INGREDIENTS

Screened bark fines as a source of carbon for increased microbial activity.

Animal Manures rich in trace elements.

Bio-products nutrient-rich sourced from freezing works' waste.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 40m³ per truck-trailer unit.

Approximately 16m³ per truck-only unit.

RECOMMENDED USE

 Mixing with existing soils.

 Large-scale planting areas.

 Establishing large rural or lifestyle block sections.

HANDLING & APPLICATION PROCESS

Barnyard Compost is suitable for storing outside for later use. Apply when the product is slightly damp by digging into the current ground media at the depth of the plant root structure.
