

Ocean Shell is an aged, deodorised crushed mussel shell, with particles sized between 0-70mm. Ocean Shell helps retain moisture which increases the effectiveness of irrigation. Ocean Shell allows plants to flourish without fighting for nutrients due to its weed-suppression properties. Its white colour also reduces the risk of pests through providing light reflectiveness under and around plants. All Ocean Shell products are organic-compliant and are acceptable for use in certified-organic areas.

PRODUCT SPECIFICATIONS

| | |
|-------------------------|----------------------|
| Particle size: | 0-70mm |
| Product type: | Shell Mulch |
| Slope tolerability: | 24° |
| Wind resistance rating: | A |
| Colour: | White |
| Bulk density: | 700kg/m ³ |
