

The ultimate mulch when it comes to landscaping. Known all over New Zealand as the solution to suppressing weeds in the spring and retaining moisture over the summer months, Forest Floor® is an all-year-round worker for your garden. During the colder months Forest Floor® also helps moderate soil temperatures as frosts may come and go. Forest Floor® contains bark fines, right up to 100mm length shreds, which allows it to bind together on steep slopes and remain in place in exposed areas. As a result of the fines aging, your garden will be fed a constant supply of nutrients over a long term. Forest Floor® is simply the most cost-effective bark for coverage.

PRODUCT SPECIFICATIONS

Particle size:	0-100mm
Product type:	Purpose-built mulch
Slope tolerability:	52°
Colour:	Chocolate-brown
Wind resistance rating:	A+
AFP:	41.2%
Bulk density:	300kg/m ³

HANDLING & APPLICATION PROCESS

Forest Floor® is suitable for storing outside. Apply at a depth of 100mm.
